

Huntsville Pediatric & Adult Medicine

A S S O C I A T E S

We treat children **and** adults

May 6, 2021

Dear loyal patient,

75% of our patient visits are now "in person". We are making it increasingly easier for patients to come in our building. If you have COVID symptoms, we often ask you to do our drive thru, same day COVID testing and then see us in office that same afternoon once we have negative COVID results.

All that enter our building are to wear a mask at all times in the building. That, combined with the other safety measures we are taking, has meant that we are not aware of a single person that has contracted COVID in our building.

We recommend the COVID vaccination as protection wherever you go. All of our doctors received the COVID vaccine months ago.

Thank you for the privilege of allowing us to participate in your healthcare

Sincerely,

Huntsville Pedi & Adult Med Associates
